Press Release of the Ullstein Concepts GmbH, Juni 2017

Innovative cargo space concepts for an optimized usage of your pickup or transporter model

The newest generation of hardtops, truck bed slides and winch systems in different versions for numerous vehicle models

As a company, which combines 30 years of market experience, Ullstein Concepts GmbH presents also this year innovative products.

The manufacturer and supplier of pickup and vehicle accessories lays its focus during the production process on user-friendly designs. It is the company's aim to supply product solutions for a simple and fast usage. Amongst other things, this includes the relevant aspect of allowing the customer to use his cargo space more efficiently.

It is a pleasure to note that these standards were also met by our newest products. The new **MaiStone winch-system** combines winch, protection guard and a winch-mounting-set. The whole system is crash-test tested. The in-house developed **WORKS Truck Bed Slides**, in the versions standard and premium, is being further developed. This step follows the flexible conception of the truck bed slide. New component solutions, which are also the foundation for a completely individualized system, will complement the truck bed slide.

The Ullstein Concepts GmbH, can also present itself as an exclusive dealer of more, well established products, such as the V4 and V2 steel hardtops from Sammitr as well as the newly developed TL1.

Ullstein Concepts GmbH is especially proud to announce to be an exclusive distributor of the products Mountain Top Roll and Mountain Top Alu Cover by Mountain Top Industries.

More information is available on our website or through an enquiry.

We are at your disposal by phone, preferably within our opening hours, or at any time online.

We are looking forward for your contact request.

Yours sincerely

Team Ullstein Concepts GmbH

MOUNTAIN TOP

ALU COVER

MOUNTAIN TOP DAS ORIGINAL mit umlaufender Reling und Sportreling. Mit 35 bis 45 Kg Eigengewicht ist dieses Cover trotz der hohen Belastbarkeit von 100 Kg ein echtes Fliegengewicht. Dank des ausgeklügelten Scharniersystem demontieren und montieren Sie die Abdeckung mit wenigen Handgriffen.

THE ORIGINAL MOUNTAIN TOP with Standard and Sport Rails. Minimum weight of 35-45 Kg and a high loading capacity of 100 Kg. The loading area remains optimally usable, because the cover can be dismantled fast again. These features, the perfect fit and excellent quality are the reasons for the popularity of this product.
